

Archery GB Postal Competitions – Score entry

Scores for the Archery GB postal competitions must be submitted to the online service. The mobile app is free and simple to use. This gives the added benefit to you that the results are instantly sent to Archery GB without having to do any further emailing or entry of scores.

Search the Google Play Store, or the Apple App Store you will need to look for ‘Ianseo Scorekeeper’

iOS Link:

<https://itunes.apple.com/app/ianseo-scorekeeper-lite/id912947613>

Android Link:

<https://play.google.com/store/apps/details?id=net.ianseo.scorekeeperlite>

After you have registered for entry into the postal league of choice, you will be sent your scorecard and unique QR code.

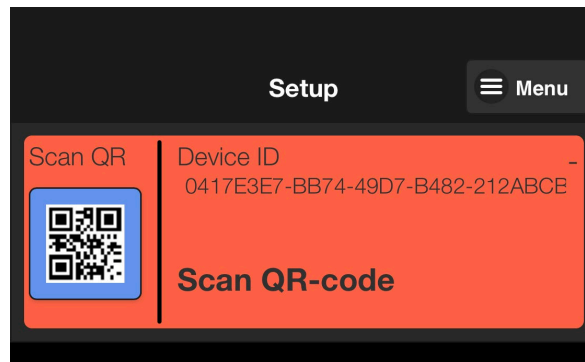

You can either:

- Take the scorecard to the field, fill it in, and then transpose the information to the app later
- Take both the app and the scorecard to the target and fill the app in live

Instructions

Open the lanseo app.

From the setup screen, click on the blue button with the QR logo. Scan the QR code that accompanies your scorecard (make sure to align the QR code in the green box).

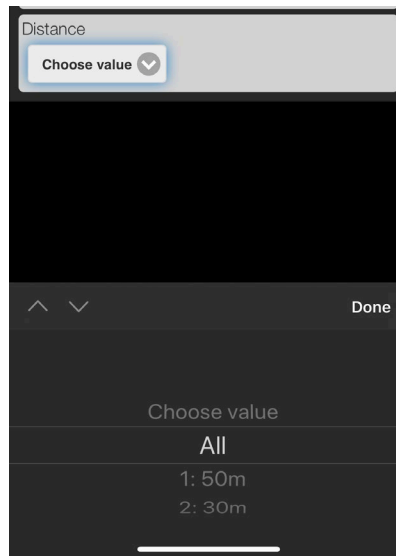

Please make sure you check the details all match the postal event you have entered

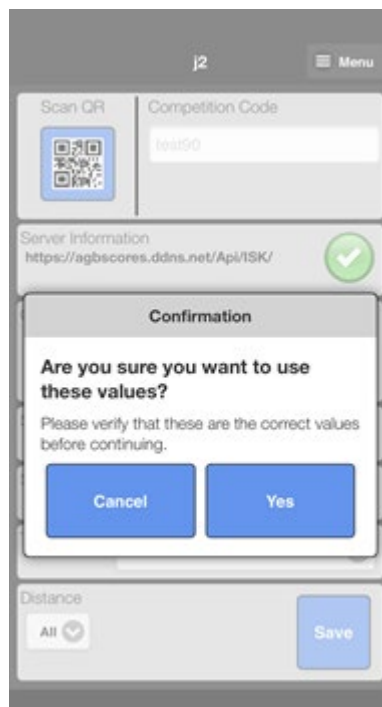

Select 'All' from the distances box as this will stop you having to change to the 2nd group of 30 arrows at the halfway point.

Press Save and 'Yes' to accept.

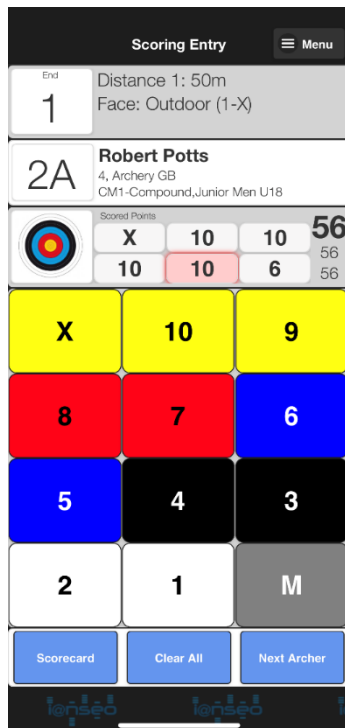

Tap the arrow value boxes to record the arrows.

If you make a mistake, you can tap an arrow value. It will turn red and you can correct it with the new one.

The example on the left below shows the first end on target 2A. The 5th arrow, a 10, is red and ready for correction to its new value (an 8). The example on the right shows the score after the arrows has been corrected – the total on the top right has changed from 56 to 54.

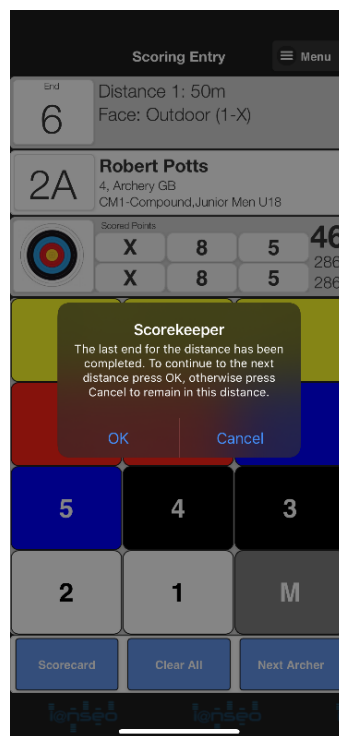

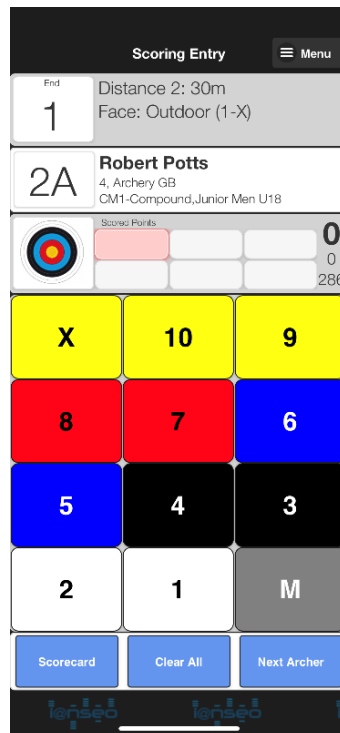

Press 'Next Archer' at the bottom of the screen - this will move you to the end summary, where it shows what your end totals are and the total score. Check for any errors *before* you press continue.

Continue adding scores until the last end. When you have completed a distance (in the case of an indoor shoot it would usually be at halfway) you will get a prompt to tell you. Check your results for the distance and then press 'OK' to move on to the second distance (or second half).

You will see that the end at the top number changes back to 'End 1', but the description now says, 'Distance 2'.

If you are doing another postal event, then when you receive the new scorecard for that event.

Click the menu icon at the top right and select 'Setup' to return to the setup menu for scanning a new code.
